

High-performance IoT Telia IoT Connect

REAL TIME MATTERS

If you need high-data, low-latency IoT connectivity, we deliver it with reliability and security you can trust. And we make it easy to manage: your connectivity, your SIMs and your subscriptions.

We can provide you with the tools and knowledge to build new service propositions, new business models or optimise your business process. And as technology and business challenges change, we can help you change with it.

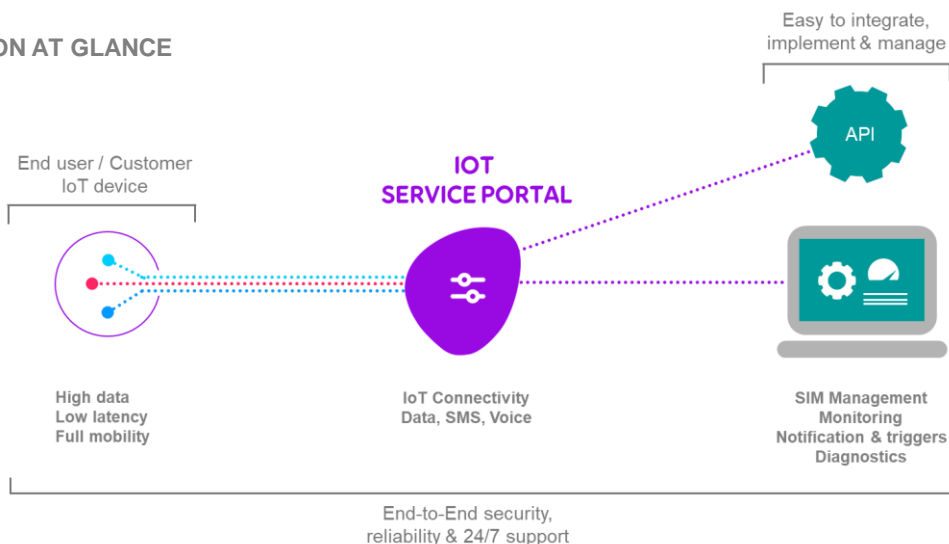

IoT Connect

IoT Connect is our high performance managed IoT connectivity offering. It connects advanced IoT applications that require high data rates, high reliability or real-time connectivity requirements. This includes things like video surveillance, fleet management, security communication to mention few.

With our IoT Connect service you can easily control and manage your IoT connectivity; SIM management and detailed reporting will always be at your fingertips.

Enterprise grade connectivity, security and reliability
There are multiple areas where high performance IoT is most favourable. When you need to know what is happening right now – and be able to do something about it. Our digital infrastructure is the largest in the Nordics and Baltics and based on 3GPP/LTE-standard. And because we own it, we control it. This means we can deliver unmatched network reliability and availability.

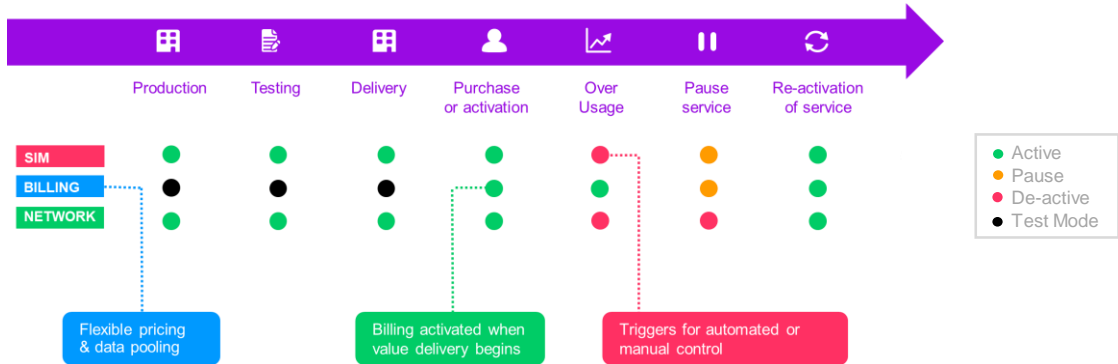

SOLUTION AT GLANCE

FLEXIBILITY TO MATCH YOUR NEEDS

Our solutions are aligned with your logistics, as well as your production and business processes. Everything is in place before billing starts, and billing only occurs when the system is activated. You can deactivate and pause the SIM when not in use and cut costs. This means that you manage both the SIM and the cost.

FLEXIBLE CONNECTIVITY MANAGEMENT

EASY TO IMPLEMENT, INTEGRATE AND MANAGE

Easy to use, agile and fast moving. You decide what you need. Through the connectivity portal, you can manage your connections by batch, range or individually. You can set up parameters so if something unexpected happens, predefined actions are triggered.

- Highlights of what you get with high performance IoT**
- Access to our portal or APIs to enable easy integration
 - Subscription Packages including SIM cards and roaming (400 partners worldwide)
 - Tailored or packaged solution: From Starter and Connect kits to customisable enterprise solutions
 - High-end subscription management

Depending on your requirements there are two levels of subscriptions:

ESSENTIALS	<ul style="list-style-type: none"> • Activate/Deactivate SIM • Change Subscription Package • Traffic info 24 hours • SIM traffic activity 7 days • SIM diagnostics • Trigger Management • Detailed Invoice in Portal • One-page invoice • Support : 08:00 – 17:00 CET 	ADVANCED
	<ul style="list-style-type: none"> • Support 24/7/365 • Pause SIM • Reports monthly & daily • API • Real-time diagnostics •
